

**Your IT Operating
Model is stuck in 1913.**

Christos Kotsidimos / The Kinetic Architect

Henry Ford's Equation

In 1913, Ford standardized every bolt to remove variance.

**In a Factory: Variance =
Defect.**

The Physics Have Changed

Today, we aren't building cars. We are mining intelligence.

In the Cognitive Economy:
Variance = Information.

The Trap

We are trying to manufacture **Novelty** (AI) using a machine designed for **Conformity** (Standardization).

Every time **Governance** kills a pilot because it 'doesn't fit the standard,' Henry Ford is haunting your P&L.

The Kinetic Mandate

- Stop Standardizing People.
- Start Standardizing Interfaces.

**Stop building Factories.
Start building Networks.**
